

Leonardo Maugeri, Ph.D.

HEAD OF STRATEGY AND DEVELOPMENT

Among the world's leading energy experts, Leonardo Maugeri is **Head of Strategy and Development at Eni**.

Born in Florence in 1964, after two degrees and a research doctorate, he specialised in international energy economics in Great Britain (London School of Economics) and the United States (Georgetown University, Washington DC), where he lived and worked as an analyst for two years.

He joined Eni in 1994 and has occupied a number of important positions, including *Assistant to the Chief Executive (1995-1998)* and *Head of Strategic Studies and International Relations (1999-2000)*, before being appointed (at the age of 36) the youngest central director in the oil company's recent history (2000), with responsibility for the Eni Group's strategies.

Since the spring of 2006 Dr Maugeri has also had responsibility for two other central functions (which have been merged with the Department for Strategy and Development) **Scientific & Technological Research** and **HSE** (Health, Security & Environment).

Maugeri is also a director of **Polimeri Europa SpA** (the Eni petrochemical subsidiary), **Italgas** and the **Fondazione Mattei**.

He is a member of the *Energy Advisory Board* and the *World Economic Laboratory* of the **Massachusetts Institute of Technology (MIT)**, as well as the *International Councillor Board* of the **Center for Strategic and International Studies (CSIS - Washington, D.C)**, the *Energy Advisory Board* of **Accenture**, the **Foreign Policy Association** (New York) and the **Rand Business Forum (Los Angeles)**.

Maugeri is the author of four books and numerous articles published by some of the world's most prestigious periodicals, including *Foreign Affairs*, *Newsweek*, *Science*, *Scientific American*, *Wall Street Journal*, *Forbes*, *Oil & Gas Journal*. He was featured on the cover of the special issue of *Newsweek* published at the end of 2006 and entirely dedicated to energy, with an article that opened the issue (an issue that closed with an article by former Vice President of the United States, Al Gore). He is also a contributor to "Il Sole 24-Ore", for which he writes a column on Global Energy.

In June 2006 his third book was published in the US, *"The Age of Oil: the Mythology, History, and Future of the World's Most Controversial Resource"* (Praeger), which rapidly became reference text for the sector and was translated into 11 languages (the Italian version was published in 2006 by Feltrinelli). In 2008 the Italian edition of his most recent book was published - *"Con tutta l'energia possibile: Tutto quello che è necessario sapere sui problemi e il futuro delle diverse fonti di energia"* (Sperling&Kupfer).
