

Eni in Mexico: contributing to the development of the energy sector

Eni has been in Mexico since 2006. In 2015, the company began with Exploration and Production activities. We are one of the main private producers in the country through Block 1 and hold interests in seven exploration blocks in the Southern Basin, 6 of which as operator.

Sáasken

In February 2020, Eni made a new oil discovery on the **Sáasken** Exploration Prospect in **Block 10**. It is located about 65 kilometers off the coast, in a water depth of 340 meters. The discovery was appraised by a second well drilled by Eni Mexico in 2021, confirming the volumetric estimation in the range of **200 million barrels of oil in place**. Upside potential is present nearby.

Sayulita

In August 2021, Eni made an additional oil discovery in **Block 10** on the **Sayulita** Exploration Prospect, located just 15 km away from the previous oil discovery. Data analysis indicates that the new find may contain between **150 and 200 million barrels of oil in place**. Evaluations are ongoing to identify synergic development opportunities in the area.

Yatzil

In March 2023, Eni made a new oil discovery on the **Yatzil** Exploration Prospect in **Block 7**. It represents Eni's eighth successful well drilled in the basin. The discovery is located 25 to 30 kilometers away from other discoveries. According to preliminary estimates, the discovery may hold **more than 200 million barrels of oil in place**.

Saasil

In May 2024, Eni made a new oil discovery on the **Saasil-1** Exploration Prospect in **Block 10**. It is located approximately 65 kilometers off the coast, in the mid-deep water of the Cuenca Salina in the Sureste Basin, offshore Mexico. The new finding may contain around **250-300 million barrels of oil in place**.

Yoopat

In July 2024, Eni made a new oil discovery on the **Yoopat-1** Exploration Prospect in **Block 9**. It represents Eni's ninth successful well drilled in the basin. The discovery is located approximately 63 kilometers off the coast, in the mid-deep water of the Cuenca Salina in the Sureste Basin, offshore Mexico. The preliminary estimates indicate a discovered potential of around **300-400 million barrels equivalents of oil and associated gas in place**.

Local training from 2016 to 2024

36 Master's degrees to young Mexicans

47 internships in all areas

24 seminars with national universities

Eni: an integrated energy company on a journey to net zero emissions by 2050

Eni is a global integrated energy company engaged in the entire energy chain around the world: from exploration, development and extraction of **oil and natural gas**, to the generation of electricity from cogeneration and **renewable sources**, traditional and biorefining and chemicals, and the development of **carbon capture and storage project (CCS)**.

Eni aims to achieve net zero emissions (Scope 1, 2 and 3) and net zero carbon intensity by 2050.
