eni

**Production capacity**

- One turbine of aeronautic design (power 42 MWe) with heat recovery and a post-combustion system
- Two cogenerating endothermic engines (power about 9.7 MWe each)
- Three auxiliary boilers (power 33 MWt)
- System for storing thermal energy (ten accumulators for a total useful capacity of 3,400 m³)

Plant type

Cogenerator

Year the new structure became operational

2015

Fuel

Natural gas

Products

Electricity
Superheated water for district heating and cooling

Eni companies served

Management Centre in San Donato Milanese

Address

via Maritano, 24 - 20097 San Donato Milanese (MI)
