

Eni: the causes of the accident are too early to speculate

Rome, December 10, 2024 – In view of the latest information relating to the people involved in the Calenzano accident, Eni would like to express again its sympathy to the families of the deceased and to the people injured or otherwise affected.

With regard to the various hypotheses that are emerging in the first hour about the dynamics and causes of the accident, Eni confirms that it is working closely with the relevant authorities in order to rigorously identify as soon as possible, through appropriate and thorough technical verifications, the real causes of the explosion, the nature of which is absolutely premature to speculate on.

Any detailed information will be made available by Eni to the relevant authorities conducting the investigations, also in order to preserve the integrity of the investigation.
